1. The documents cited in the international search report merely represent the technological background and do not suggest the present method or the core-shell particles and associated molding compounds produced by said method (PCT Article 33(3)).

2. The applicants were able to demonstrate that they have solved the problem of interest (pages 6 and 7); see in particular the results in table 2 of the examination of the molding compounds that were obtained as well as the associated explanations on pages 33 and 34. These results are considered surprising and support the involvement of the required inventive step.
